

Instruments and final control for the process loop

Everything State & Lake Instrumentation makes, in nine categories from measurement through to the valve. Each has its own data sheets; this card is the map.

Flow measurement

Clamp-on, magnetic and turbine meters

HF-720 • MF-400 • FS-90

Pressure

Transmitters, switches and gauges

PT-500 • DP-220 • PG-40

Level

Radar, guided-wave and float level

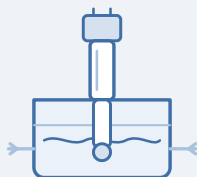

LV-300 • GW-140 • LS-22

Temperature

RTDs, thermocouples and thermowells

PT-100 • TC-K • TW-Series

Analytical

pH, ORP, conductivity and DO sensors

PH-600 • CN-300 • DO-450

Valves & final control

Solenoid, ball and butterfly valves

SV-Series • MV-80 • LA-24

Controllers & I/O

Modular controllers and remote I/O

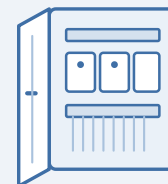

Nexus N-1 • N-I0 • GC-200

Operator interface

7- to 15.6-inch operator panels

Vantage V-7 • V-15

Panels & enclosures

UL 508A panels and NEMA 4X enclosures

EC-4X • PB-Series

CE CE marked

UKCA UKCA marked

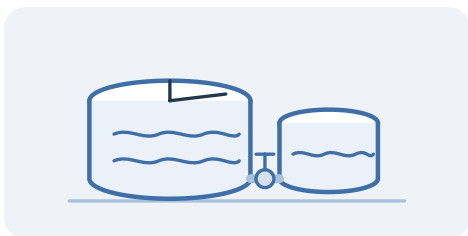

UL UL listed

EX ATEX Zone 2

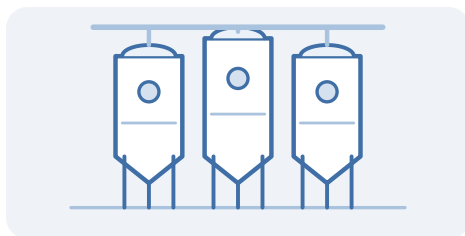

ISO ISO 9001:2015

INDUSTRIES WE SERVE

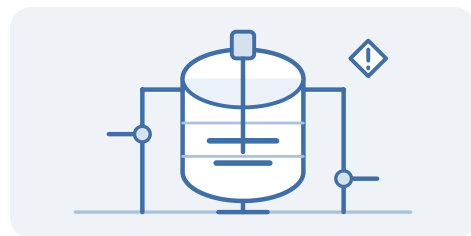

Six sectors account for most of what leaves the building; if your loop looks like one of these, we have specified it before.

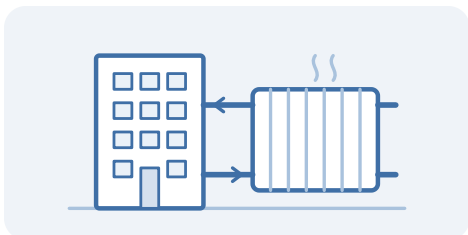

Municipal water & wastewater — Intake, filtration and outfall metering

Food & beverage — CIP circuits, batching and plant utilities

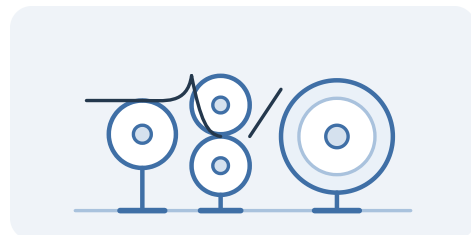

Chemical processing — Dosing, transfer and hazardous-area loops

District energy & HVAC — Chilled water, thermal energy, sub-metering

Power generation — Feedwater, cooling and auxiliary systems

Pulp, paper & metals — High-temperature and abrasive service

HOW WE WORK

Specified, not just sold: Send a P&ID or equipment list; we return a tag list with item numbers.

Stocked in Chicago: Common sizes ship the same day; configured instruments in five to fifteen days.

Supported for ten years: Three-year warranty as standard; ten-year spares commitment on every line.

When you need the numbers

Every series on the front has a released data sheet on our website; the short-form catalog carries list prices, pack quantities and lead times for the stocked range.
